SUMMARY

Motivated AIML developer with a strong foundation in Machine Learning, Deep Learning, and Computer Vision. Experienced in building real-world applications such as face recognition systems, Agentic AI solutions, and cloud-based platforms. Proficient in Python, with a focus on developing scalable and efficient solutions. Adept at leveraging AI techniques to solve complex problems and secure cloud-based platforms. Skilled in Python development with a focus on scalable solutions.

EDUCATION

Rajalakshmi Institute of Technology, Chennai

Bachelor of Engineering in CSE (AI & ML) | CGPA: 8.48

ST Mary's Girls Higher Secondary School, Chennai

Higher Secondary Education | Percentage: 93.66%

PROJECTS

Smart Payment Scheduler System

Tech Stack: React.js, Flask, MySQL, Razorpay API, REST API

- Developed a full-stack payment scheduling application that enables users to schedule future payments similar to Google Pay.
- Integrated Razorpay Payment Gateway API for secure payment processing and transaction verification.
- Designed RESTful APIs using Flask to manage payment scheduling, transaction history, and user authentication.
- Designed a MySQL database to manage users, scheduled payments, and transaction records.
- Implemented payment status tracking and seamless frontend-backend integration.

Smart Cloud File Storage

Tech Stack: React.js, Flask, Python, Random Forest, MySQL

- Developed a secure cloud-based file storage platform supporting multiple file formats.
- Implemented authentication, file upload workflows, and user activity monitoring.
- Integrated an AI-based malware detection model to identify suspicious files before upload.
- Designed Flask APIs for secure communication between frontend and backend.

Face Recognition-Based Attendance System

Tech Stack: Python, TensorFlow, OpenCV, NumPy, MySQL

- Developed a contactless attendance management system using real-time face recognition.
- Implemented facial detection, registration, and automated attendance logging.
- Optimized model performance for improved recognition under varying lighting conditions.
- Stored attendance records securely in a MySQL database.

INTERNSHIPS

Eval Bench Tech – Web Development Intern

- Built dynamic web applications and optimized front-end performance using HTML and CSS.
- Collaborated with team members to debug issues and deploy feature updates.
- Optimized website performance to enhance speed and efficiency.

Rajalakshmi Institute of Technology – AIML Intern

- Built Machine Learning models for prediction and analysis.
- Collaborated with Mentor to debug issues and deploy feature updates.
- Models achieved an accuracy of 90%(linear regression , Gradient Descent).

Aadhira Bright Mind – AI & Data Science Intern

- Developed and deployed Transformer-based text classification systems for real-world applications.
- Developed and implemented a Face Recognition-Based Attendance System with real-time processing.
- Worked on space image denoising models with dataset improvement and processing.
- Explored performance improvement through technical validation and testing.
- Performed data wrangling, analysis, and technical discussions to enhance domain knowledge.

SKILLS

- | | |
|--|----------------------------|
| • Programming: Python, SQL | • Frontend: REACT |
| • AIML: Machine Learning, Deep Learning | • Backend: Flask |
| • Database: MySQL, MongoDB | • Testing: selenium |

ADDITIONAL SKILLS

- | | |
|------------------------------------|--------------------------------------|
| • Problem Solving (300+ SkillRack) | • TimeManagement |
| • Communication | • Leadership (Team Co-Lead at IARRD) |

TRAININGS ATTENDED

- | | |
|-------------|-----------------------------|
| • Infocepts | • Cognizant (Deep Skilling) |
|-------------|-----------------------------|
